

## Powerful Wireless LED Color Changer

### DL-50

**Dimensions:**

Length 4.0" x Width 2.7" x Height 2.2" - Operating frequency 916 Mhz

Controlled by wireless radio transmitter as well as wireless DMX (through proprietary transmitter). Operates on a 12 volt rechargeable battery housed within a durable enclosure. In a single color, the COMPACT can achieve up to 10 hours of battery life. When powered at 100% red, green and blue, the COMPACT has a life of 6 hours. Can be charged to 100% in less than 4 hours. Multiple fixtures can be used on a single transmitter by setting the address to one of 90 address settings. Operating range is +400 feet. All testing performed in open field. Distances may vary depending upon environment and local interference.

Compact Remote  
or DMX
